

Task 1 - Install and Configure DHCP

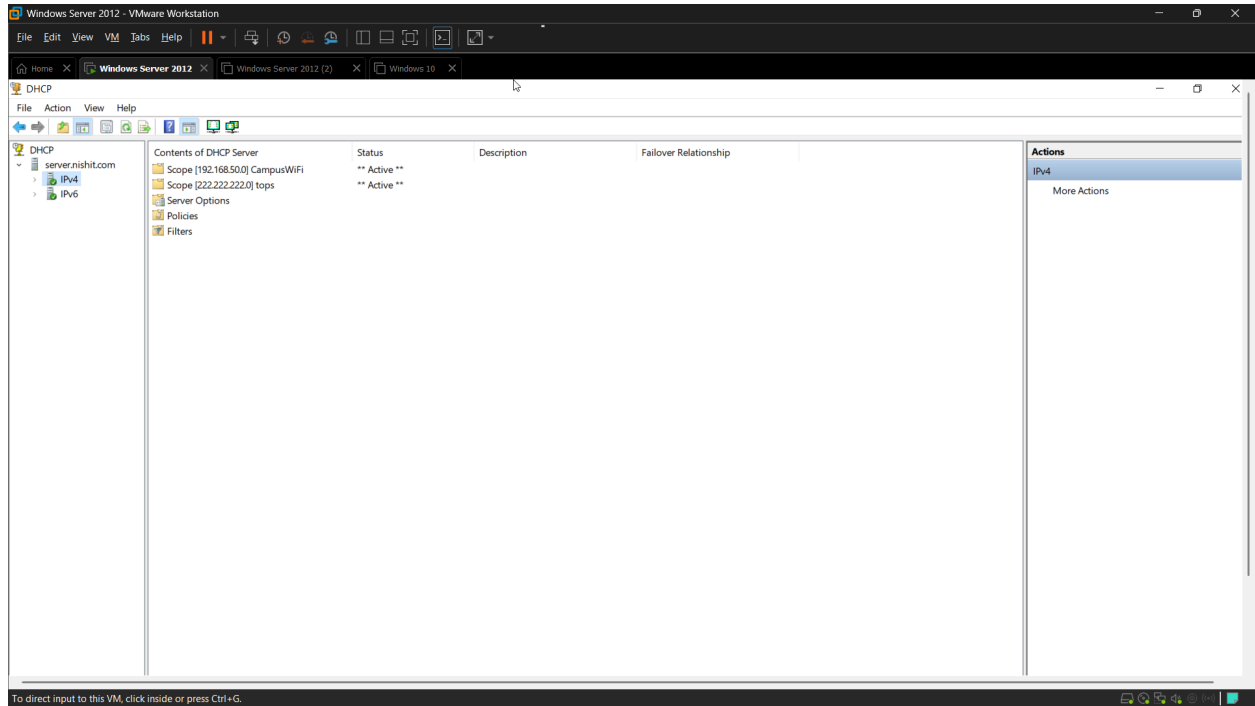

Install DHCP Role

- Open Server Manager
- Click Manage
- Add Roles and Features
- Select DHCP Server
- Install and complete the post-installation configuration

Create DHCP Scope

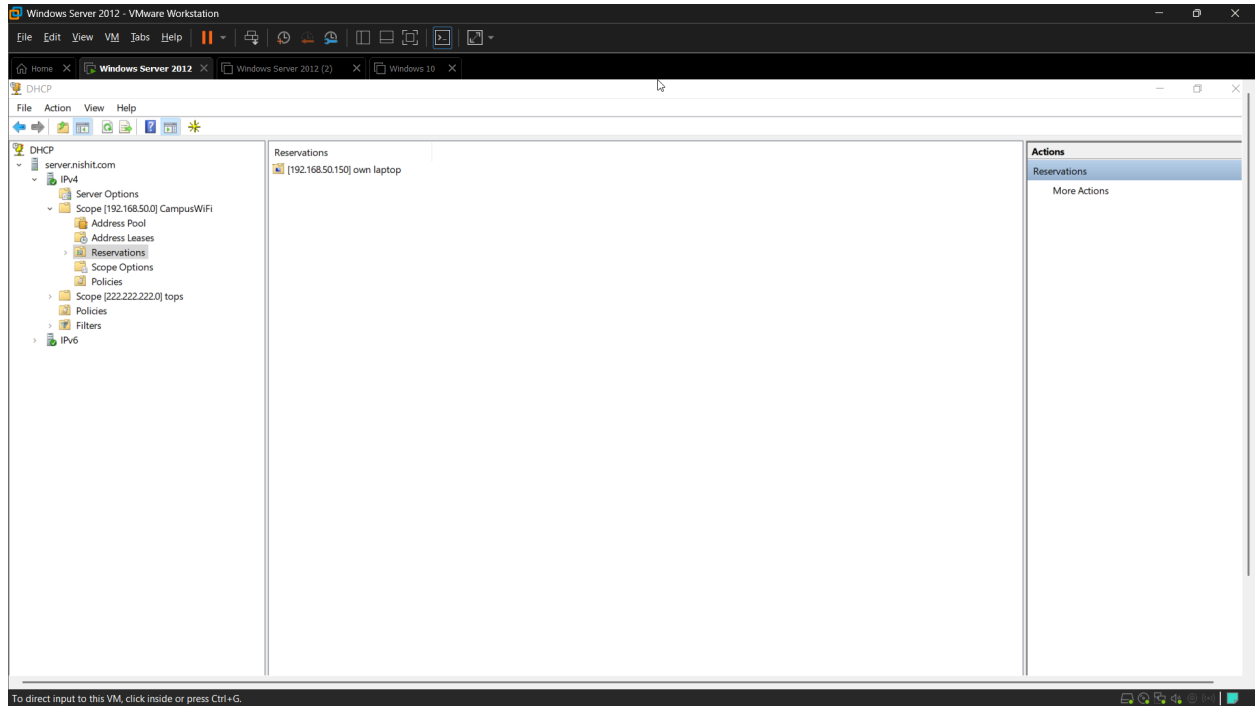

- Open Tools
- DHCP
- Expand your server
- Right-click IPv4
- New Scope
- Scope name - CampusWiFi
- Starting IP - 192.168.50.100
- Ending IP - 192.168.50.200
- Subnet mask - 255.255.255.0

Task 2 - Create DHCP Reservation

Steps

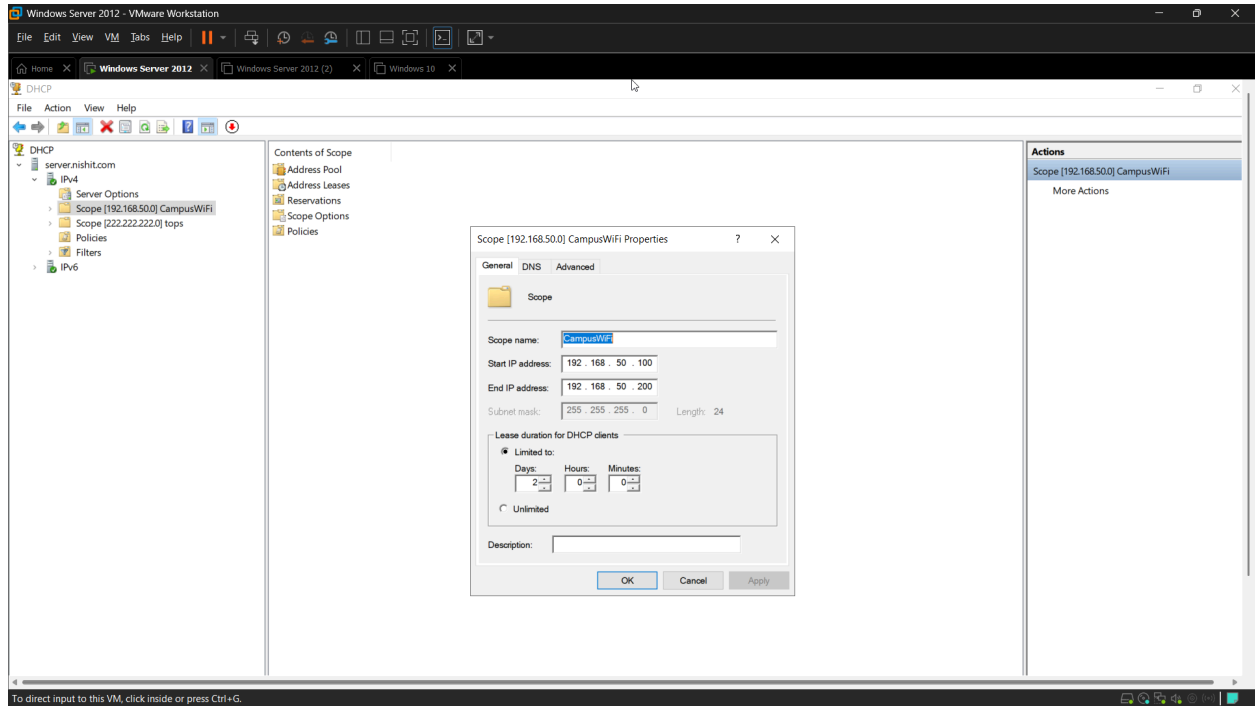

- Open DHCP Manager
- Expand
 - IPv4
 - CampusWiFi
 - Reservations
- Right-click Reservations
- Select New Reservation

Task 3 - Change lease duration

Steps

- Right-click CampusWiFi
- Select Properties
- General Tab
- Change Lease Duration to 2

Task 4 - Verify Client Gets IP

Steps

- Open Network Adapter settings
- Set IPv4 to obtain an IP address automatically
- Open Command Prompt
 - `ipconfig /release`
 - `ipconfig /renew`
 - `ipconfig`
- Expected result
- IPv4 Address
 - 192.168.50.
- Subnet Mask
 - 255.255.255.0
- If the client MAC matches the reservation
- IPv4 Address
 - 192.168.50.150
